

Ge Profile fridge Freezing food

this is a video about repairing the damper door rather than replacing it.

Written By: Dan Dunham

INTRODUCTION

Repair the damper assembly door rather than replacing the entire assembly.

TOOLS:

- [Heat Gun](#) (1)
-

Step 1 — Damper

- This video is about repairing a broken damper door rather than replacing the regulator assembly.

Step 2

- All the steps are in the video but in general do the following.

Step 3

- Empty Fridge, remove the regulator at the top rear of the fridge, check and see if its a broken damper door. assuming it is remove the damper motor assembly with the broken door and use a heat gun to weld them back together. adjust the assembly as needed and replace the damper assembly and test.

To reassemble your device, follow these instructions in reverse order.
